

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strike through~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims 1, 10, and 15 in accordance with the following:

1. (CURRENTLY AMENDED) A computer-readable recording medium recorded with a data item list display program for causing a computer to function as list display means for displaying a plurality of data items in different display forms in a list, the display forms corresponding to respective attributes of the data items and defining respective ways of displaying the list of data items.

2. (ORIGINAL) The recording medium as claimed in claim 1, wherein the program causes said list display means to include a table of correspondence between the attributes and the display forms, and to determine the display forms of the data items displayed in the list by referring to the table by the respective attributes of the data items.

3. (ORIGINAL) The recording medium as claimed in claim 2, wherein the program causes said table to have the display forms corresponding to the attributes and predetermined conditions, and causes said list display means to determine the display forms of the data items displayed in the list by referring to said table by the respective attributes and contents of the data items.

4. (ORIGINAL) The recording medium as claimed in claim 1, wherein the program causes said list display means to add icons of different sizes corresponding to the display forms to the data items in displaying the data items.

5. (ORIGINAL) The recording medium as claimed in claim 4, wherein the program causes said list display means to function as alignment and display means for aligning and displaying each of the data items of the different display forms.

6. (ORIGINAL) The recording medium as claimed in claim 5, wherein the program causes said alignment and display means to function as area management means for managing an area in which data items are displayed and an area required to display the data items of the respective display forms.

7. (ORIGINAL) The recording medium as claimed in claim 5, wherein the program causes said list display means to function as sorting and display means for sorting and displaying the data items of the respective display forms.

8. (ORIGINAL) The recording medium as claimed in claim 1, wherein the program causes said list display means to function as column header display means for displaying a column header corresponding to a display form of a selected one of the data items displayed in the list.

9. (ORIGINAL) The recording medium as claimed in claim 8, wherein the program causes said list display means to function as column display width change means for changing a column display width of one of the data items which one corresponds to a displayed column header by changing a column display width of the displayed column header.

10. (CURRENTLY AMENDED) A data item list display apparatus for displaying a plurality of data items in a list, the apparatus comprising:

list display means for displaying a plurality of data items in different display forms in a list, the display forms corresponding to respective attributes of the data items and defining respective ways of displaying the list of data items.

11. (ORIGINAL) The apparatus as claimed in claim 10, wherein said list display means adds icons of different sizes corresponding to the display forms to the data items in displaying the data items.

12. (ORIGINAL) The apparatus as claimed in claim 11, wherein said list display means comprises alignment and display means for aligning and displaying each of the data items of the different display forms.

13. (ORIGINAL) The apparatus as claimed in claim 12, wherein said list display means comprises sorting and display means for sorting and displaying the data items of the respective display forms.

14. (ORIGINAL) The apparatus as claimed in claim 10, wherein said list display means comprises column header display means for displaying a column header corresponding to a display form of a selected one of the data items displayed in the list.

31
15. (CURRENTLY AMENDED) A method of displaying a plurality of data items in a list, the method displaying a plurality of data items in different display forms in a list, the display forms corresponding to respective attributes of the data items and defining respective ways of displaying the list of data items.

16. (ORIGINAL) The recording medium as claimed in claim 1, wherein the program causes said list display means to change types of fonts based on the display forms of the data items in displaying the data items.

17. (ORIGINAL) The apparatus as claimed in claim 10, wherein said list display means changes types of fonts based on the display forms of the data items in displaying the data items.
